RECIPE: Dutch Oven Peach Cobbler

INGREDIENTS:

(1) Lg can of sliced peaches
(1) package of butter yellow cake mix
(1) stick of butter
ground cinnamon (for dusting - optional)

NOTES/DIRECTIONS:

1. Prepare your fire using charcoal pieces. Rub the inside of the Dutch oven with cooking oil. Place 8 pieces of charcoal under the oven and 20 pieces on top. When the oven is hot start adding ingredients.
2. Pour peaches and juice into the oven. Next add the dry cake mix on top of peaches (do not worry about mixing them). Cut the butter into small chunks and place on top of the cake mix. Dust everything with cinnamon very lightly if you wish. Place the lid back on the oven and bake for 40 min. Check cake with a clean straw or knife - if comes out clean its done, if not add a little more charcoal and bake another 10 min.

*2 cans of peaches makes a juicier cobbler.
*A double batch can be baked in a 14" Dutch oven
